Reference: E263

Truck Skate, adapter plate 10-hole/22.5"

HGV wheel dolly Truck Skate, a towing aid or a means of being able to drive a heavy vehicle with a blocked wheel, seized bearing, rear axle damage etc. The Truck Skate replaces the wheel enabling the vehicle to be moved to the next garage or safe parking area. The Truck Skate is suitable for use as an emergency wheel and is delivered with an adapter ring for all 22.5" 10-hole wheels. Further adapter rings can also be ordered separately! It is also possible to use the Truck Skate on electric wheel hub motors of trolley buses without an adapter ring. The Truck Skate has dual axis compensation which guarantees that all 4 heavy load wheels share the load equally. The Truck Skate is zinc-plated and a shunting rod is included. Ref E263
