

SLIPPERY JIMMY 6ft

Price: £12.95

Reference: E41

Super Jimmy. This ingenious tool is designed to reach completely across the front seat of a vehicle to operate the door lock mechanism. The Super Jimmy works on 2-door coupes (no frame around the driver or passenger door window) so you can insert a window wedge and slip the tool through the space created. Once inside, the WB-6 allows you to either press the unlock button, operate the manual lock button or pull the door handle. Splits in half for easy storage.
